DESCA-HOR

CEMENT AND RUST REMOVER

CHARACTERISTICS

DESCA-HOR is a remover for cement remains, coming from mortars and concretes. While it cleans cement remains, removes every rust remains from the oxidized areas, leaving metal surfaces free of previous oxidizing. It has acid character and clear-light yellow appearance, and it's been formulated based on organic and inorganic acids, humidifying agents and corrosion inhibitors.

USES

DESCA-HOR is especially formulated for removing cement and mortar remains in new construction or in old buildings rehabilitation.

For set cement remains removing, for cleaning trucks, concrete mixers, framing moulds, shores, brackets, screws and in general any machinery used in construction industry which has concrete or mortar remains.

METHOD OF USE

DESCA-HOR must always be used cold. The most suitable method of use will depend on the surface to be cleaned. So, it can be used by spraying, by immersion or by acid resistant brush.

In case of concrete mixer cleaning, a good solution is using solutions of **DESCA-HOR** making them work inside the mixer, just as if it were making a usual mix. Rinse afterwards with plenty of clean water.

In case of use by immersion, the tanks containing the **DESCA-HOR** solutions must be made of an acid resistant material, such as plastic, glass-fibre, etc.

After cleaning with **DESCA-HOR** it is necessary to rinse thoroughly the surfaces, followed by a final passivation in order to avoid subsequent oxidations. When it were necessary a protection against the environment oxidation, we recommend using our **MECA-PROT** applied by spraying or brush, since it rejects dampness and protects against oxidation.

Always use in well ventilated places, or supply suitable ventilation when necessary.

DOSES

The concentration of the dilutions of **DESCA-HOR** to be used will depend on the type and amount of remains and rust to remove. In general, it's usually enough to use dilutions 1:3 with water in order to remove scale and cement remains.

PRECAUTIONS

It can cause burns when pure. Irritates Irritating to respiratory system. Do not swallow. Keep away from children. In case of contact with eyes, clean immediately with plenty of water and seek medical advice. In case of unsuitable ventilation, use suitable breathing equipment

PACKAGING

DESCA-HOR is packaged in 30 and 60 litres original, non-reusable plastic containers and in 1000 litres plastic containers.

ADVANTAGES

- Unexpensive
- High cleaning power
- Concentrated product.
- Removes rust from oxidized areas.
- Easily removes mortar and concrete remains.
- Recommended for cleaning construction machinery
